**Subject:** Re: Additional question

Let me make sure about this tomorrow morning, but, it is my understanding that the msds that freedom provided addressed their "proprietary" mixture of (I believe) 2 "PPH compounds;" each with its own msds (provided by the manufacturer-in this case, Dow).

**Subject:** Additional question

OCIR has received another question from Rockefeller staff,

We're hearing that Dow may have posted the information on PPH even though its proprietary. Have you heard this as well or happen to know where that information would be?

Have we heard this directly or second hand from ATSDR (or not at all)? I understand that ATSDR may have received samples from Dow but this is another question. I continue to be grateful for your assistance with these inquiries. Thanks! Linda
